

BUMP IT UP

We are all connected

IN THE GREAT CIRCLE OF LIFE

Year 4 Term Update

This term, Year 4 have been working hard to build their skills in finding, gathering, researching, and using information to create persuasive arguments. Students have shown great success in transferring this knowledge to all their key learning areas, including Health, HASS, Media Arts, Digital Technologies, and Science.

Our main focus has been on understanding our waste footprint and exploring practical ways we can reduce it. Together, we have been identifying actions that help us become more sustainable at both school and home. This learning is also preparing students to take on the exciting role of becoming EcoMarines Ambassadors in the near future.

Year 4 should feel very proud of their efforts so far—we are looking forward to continuing our sustainability journey next term!
